TOTE SEAL
Designed Specifically for Totes

SAMPLE
00000156

The Tote Seal is a fixed-length security seal designed specifically to secure tote boxes used to
transport merchandise from one location to another. Because totes require two seals to be
properly secured, the Tote Seal is always manufactured in "twin" sets with identical numbers.

Features:

• Durable, all plastic, one-piece construction.

• Patented, tamper-resistant locking mechanism and design.

• Thin, flat sealing strap designed to fit most totes; available in 2 lengths.

• Identically numbered and hot stamped with a company name or logo.

Seals shown not actual size.

Applications:

• Tote Boxes

       11" seal: 10 lbs.

Box Dimensions:

Breakstrength: 7" seal: 9.4" x   8.3" x 17.7"

                    44 lbs.   11" seal: 9.4" x 12.2" x 17.7"

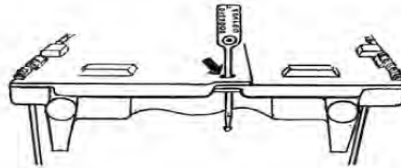

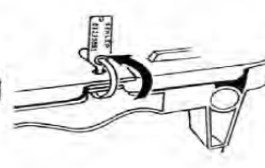

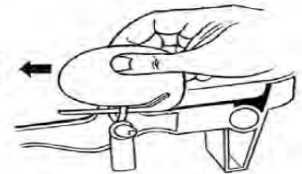

Apply and Remove

1. Twist and pull apart the two seals as shown.

2. Insert sealing strap through TOP of holes on both ends of tote box.

3. Bend around edge of tote lid and insert tip into locking barrel. Push in firmly until seal "clicks". Tug to insure proper engagement.

4. To remove seals, use a safety blade (as shown) or scissors.
